

AUSTRALIAN REGIONAL LABOUR MARKETS

DECEMBER QUARTER 2001

Number 97

Introduction

The regional labour market estimates presented in this brochure are three monthly averages derived from the Australian Bureau of Statistics Monthly Labour Force Survey. These estimates are not adjusted to take account of seasonal and other variations and can exhibit irregular movements. They should therefore be used with caution.

Related information

The DEWR *Small Area Labour Markets, Australia* publication is also available at <http://www.workplace.gov.au> or free of charge upon request. It presents quarterly estimates of unemployment rates and numbers for Statistical Local Areas.

Breaks in series

In April 2001, the ABS revised the definition of employment and unemployment used in the Monthly Labour Force Survey. Estimates at the State/Territory level have been backcast by the ABS to April 1986. Accordingly, the annual changes in this brochure at the National, State and Territory level are not directly comparable with those at the regional level.

Next issue

The next issue of *Australian Regional Labour Markets*, for the March quarter 2002 is expected to be distributed in late April 2002.
